EDUCATIOON 3000

Tomorrow's Education, Today

The conference's topics is about the new findings in neuro-science in Education: what are the changes in today's children on a physiological, psycho-emotional and neurologic level. What kind of Education do we need?

The workshops are about comprehensive and fun pedagogic tools for the third Millennium and the 7 Petals Schools. How to combine high academic level with wellbeing, creativity, Emotional Intelligence and Peace Culture? Among other subjects available.

We believe this would generate a synergetic exchange in which your Institution and Educatiooon 3000 will celebrate an unprecedented achievement in the field of innovation and Education.

To conclude, Educatiooon 3000 has intertwined a broad network of alliances in which each member has strengthened its specific sector. It is in our belief that the above mentioned agenda, will be of great advantage for both parts.

With gratitude,
We are looking forward hearing back from you.

Yours truly,
Beatrice Favalli
